RECOMMENDATION

That the information be noted.

NARROMINE SHIRE COUNCIL
ORDINARY MEETING BUSINESS PAPER – 12 MAY 2021
REPORTS TO COUNCIL – INFRASTRUCTURE AND ENGINEERING SERVICES

2. VARIATION TO WASTE MANAGEMENT SERVICES CONTRACT T16-036

Author	Manager Waste & Community Facilities
Responsible Officer	Director Infrastructure and Engineering Services
Link to Strategic Plans	CSP – 3.1.7 Reduce waste to landfill through effective and efficient domestic waste and recycling services to the community.

Executive Summary

The purpose of this report is to inform Council of a variance to the Waste Management Services Contract T16-036, in regards to the implementation of a fortnightly collection service for the general waste from residential properties.

Report

This report is a follow up on the Council resolution 2020/043, of 11 March 2020. The implementation of any education materials has been hampered by the COVID-19 Pandemic and this has resulted in not being able to promote the separation of Waste that is required to further reduce the mixing of materials in the recycling and FOGO collection cycles.

Council entered into a 10-year contract for the collection of general waste with J R Richards on 29 June 2018. This contract included the collection of General, Recyclable and Organic waste.

The contract included the option of having the general waste collection service change to a fortnightly collection three years after the introduction of the Food and Organic (FOGO) collection system. This is due to occur from 1 July 2021.

As part of the contract with the introduction of the FOGO collection service, there was an expectation of a reduction to the general waste component of approximately 40%. This has not occurred in the two years of operation as yet, and FOGO still makes up a large contribution of the general waste stream.

The contractor has indicated it is willing to continue with a weekly collection. This will come at a cost since the original intent was to have a reduction of FOGO in general waste streams, and the contractor has priced its waste collection services accordingly. These additional costs will not be reflected in any real cost but applied within the annual CPI increase to the Fees and Charges.

Financial Implications

Council is able to absorb the initial cost increase within the normal CPI increase applied to the collection service of 2.67% with the increase to service cost being 69% of that CPI increase.

2. VARIATION TO WASTE MANAGEMENT SERVICES CONTRACT T16-036 CONT.

Legal and Regulatory Compliance

Environment Planning and Assessment Act 1979 No 203
Waste Avoidance and Recourse Recovery Act 2001 No 58
WHS regulation 2017

Risk Management Issues

Variance to existing contract.
No health impacts due to the continuation of an existing service.
Potential increase in illegal dumping if collection schedule is changed at this stage.

Internal/External Consultation

Correspondence with the contractor in regards to proposed cost of a weekly service.

It is noted that other Councils that have taken up the FOGO service have experienced similar lack of general waste reduction levels.

Attachments

Nil

RECOMMENDATION

1. That Council note the variance to the existing contract T16-036 to allow for the continuance of a weekly collection of the general waste until end of June 2024.
2. That this variance be in place from 1 July 2021 and be reviewed again prior to 1 July 2024.
3. That Council further promote the FOGO service.
4. That Council conduct a waste stream audit by end of 2023 for a further report due in 2024.

André Pretorius
Director Infrastructure and Engineering Services
